## Heath Technology Implementation Strategies in the Federal Government

Project Title	Heath Technology Implementation Strategies in the Federal Government
Summary	Internship with the U.S. Department of Veterans Affair's Central Office aimed at increasing the use of technology (mobile health, telehealth, etc) in clinical care to improve health outcomes.
Country	United States

### **Project Description**

Are you excited about the intersection of technology, data, and innovation and what it means for the future of healthcare? Then, this is the internship for you! We are seeking enthusiastic students who are interested in leveraging technology to improve health outcomes and have strong research, educational design, data analysis, and analytic writing skills. Interns will be involved in projects to include, but not limited to, education and training development, implementation studies, and evaluation related to virtual/digital health care technologies. #healthtechnology #digitalhealth #connectedcare #technology #mobilehealth #apps #telehealth #implementationscience #federalgoverment #veterans #healthcare #research #mentalhealth #medicine #training #va #innovation #psychology #dataanalysis
